

SUMMARY

Full-stack AI/ML engineer specializing in multi-agent orchestration, production RAG pipelines, and enterprise GovTech platforms. Proven track record architecting AI systems for government initiatives (Manthan-Riti project across 41 districts), combining LangGraph multi-agent execution, FastAPI backends, Next.js UIs, and real-time database integrations.

SKILLS

- **Languages:** Python, SQL, JavaScript (intermediate)
- **Backend/DB:** FastAPI, Flask, Async Python, Supabase, PostgreSQL, REST APIs
- **AI/GenAI:** LangChain, LangGraph, MCP, RAG, Multi-Agent Systems, Prompt Engineering, Groq, Gemini, Ollama
- **Vector/NLP:** Qdrant, ChromaDB, FAISS, Sentence Transformers, spaCy, NLTK

WORK EXPERIENCE

Aasvaa Innovation Labs | Machine Learning & AI Engineer | Jan 2026–Present

- Co-developed the GovTech Planning Intelligence Platform (“Ask Manthaa OS”) full-stack features + AI chatbot layer over live Supabase data across 41 districts.
- Architected a 7-stage multi-agent Legal AI engine (FastAPI + LangGraph + Groq Llama 3.1 70B) with hybrid retrieval (Tavily real-time search + Qdrant over 70K+ Supreme Court vectors) achieving a 3.2% hallucination rate and <2.2s latency.

PockyDoc | AI Product Engineer Intern | Apr–Jun 2026

- Architected end-to-end AI system design and led project execution, aligning technical delivery with product roadmap strategy.
- Conducted Exploratory Data Analysis (EDA) on core datasets, extracting data-driven business insights to shape feature development.

Klear AI | AI/ML Engineer Intern | Aug–Nov 2025

- Built production RAG pipelines (LangChain + Qdrant + Groq Llama 3.1 70B) with embedding optimization and custom retrieval tuning.
- Developed GenAI workflows: prompt-engineering pipelines, CNN image-detection models, and evaluation benchmarks.

PROJECTS

Manthan-Riti Project | Talk-to-Data & Budget Analyser | Apr 2026–Aug 2026

- Architected the AI “Talk-to-Data” conversational engine enabling natural language querying over live governance metrics across 41 districts, 457 blocks, and 14,000+ local bodies.
- Built “Ask Manthaa OS”: full-stack Hindi/English NLP assistant over 11.87L aspirations, automating district strategic briefs (42 PDFs) and 9-sector KPI dashboards at 95.87% uptime.
- Engineered an AI-powered Budget Analyser engine computing optimal fund allocation by criticality score, baseline deficit, and funding status per sector.

SarkariSaathi AI GovTech Platform | Next.js 14 + Supabase | GitHub | Live

- AI-powered GovTech platform helping Indian citizens navigate government services across 30 states without paid middlemen.
- Built on Next.js 14 + Supabase with full Hindi/English i18n, seeding 27+ state-specific guides via SQL migration; Gemini intent detection, BetterAuth, and ArcJet rate limiting.
- Cut query-to-answer time from 15–20s to 2–3s (80–85% reduction); SEO-optimized structured metadata achieved full search-engine indexing.

Legal AI System | LangGraph Multi-Agent Engine | GitHub

- 7-stage deterministic multi-agent research engine (LangGraph + Groq Llama 3.1 70B) over 70K+ Indian Supreme Court judgments.
- Hybrid retrieval: live web research via Tavily API fused with semantic vector search via Qdrant.
- Confidence-scored outputs [30–95], self-healing JSON parsing, hallucination guard, 0.91 retrieval precision, and 3.2% hallucination rate.

ArthMitra | AI-Powered Financial Security Platform | GitHub

- LangGraph Supervisor routing a 3-agent swarm (Auditor/Shield/Mitra) across Deepseek-R1, Qwen2.5, Gemma3, and Groq Llama-3.1.
- Shield ML: TF-IDF+LR, Random Forest, and One-Class SVM for real-time SMS-scam detection, transaction-risk scoring, and credit profiling; Next.js glassmorphism UI.

EDUCATION

JECRC University | B.Tech CSE (AI & ML) Specialization — CGPA: 7.2 | 2022–2026

CERTIFICATIONS & ACHIEVEMENTS

- **Invited Speaker:** Conducted GenAI AI fundamentals workshop for 100+ non-tech students at Poddar University in collaboration with SetuSansthan NGO.
- **LangChain Academy:** 9 certifications in LangChain, LangGraph, LangSmith, agentic architectures.
- **GSEA Winner:** Suraksha Nivesh AI stock-scam prediction project.
